## Parametry produktu

|                                  |                        |
|----------------------------------|------------------------|
| <b>Typ akcesoriów car audio:</b> | półkieszeń do radia cb |
|----------------------------------|------------------------|

|                                    |          |
|------------------------------------|----------|
| <b>Wymiary otworu montażowego:</b> | 140x41mm |
|------------------------------------|----------|

|                                     |                                             |
|-------------------------------------|---------------------------------------------|
| <b>Przeznaczenie - marka radia:</b> | Albrecht, AUDIOTEC, Lafayette, Omega, Yosan |
|-------------------------------------|---------------------------------------------|

|                                     |                                                                                                                                                |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Przeznaczenie - model radia:</b> | Albrecht AE-6690, AUDIOTEC Areo, Lafayette Ares, Lafayette Ermes, Lafayette Zeus, Yosan JC850, Yosan JC2204/2205, Yosan PRO-110, Yosan PRO-120 |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|

|                               |                      |
|-------------------------------|----------------------|
| <b>Właściwości car audio:</b> | z centralnym otworem |
|-------------------------------|----------------------|

## Informacje dodatkowe
