## Parametri produs

|                                 |          |
|---------------------------------|----------|
| <b>Tip accesorii car audio:</b> | splitter |
|---------------------------------|----------|

|                            |             |
|----------------------------|-------------|
| <b>Interval frecvență:</b> | AM, DAB, FM |
|----------------------------|-------------|

|                                         |                                                              |
|-----------------------------------------|--------------------------------------------------------------|
| <b>Caracteristicile radioului auto:</b> | conductor roșu +12V, conductor verde - masa, cu amplificator |
|-----------------------------------------|--------------------------------------------------------------|

|                   |            |
|-------------------|------------|
| <b>Conexiune:</b> | DIN, SMB-B |
|-------------------|------------|

|                       |      |
|-----------------------|------|
| <b>Lungime cablu:</b> | 0,6m |
|-----------------------|------|

|                               |      |
|-------------------------------|------|
| <b>Amplificare bandă DAB:</b> | 20dB |
|-------------------------------|------|

|                              |      |
|------------------------------|------|
| <b>Amplificare bandă AM:</b> | 10dB |
|------------------------------|------|

**Amplificare bandă  
FM:**

10dB

**Tensiune alimentare:**

12...24V DC

## Informații suplimentare

**Greutate brută:**

0,028 kg
