## Parametri produs

|                                 |                       |
|---------------------------------|-----------------------|
| <b>Tip accesorii car audio:</b> | cadru pentru radio CB |
|---------------------------------|-----------------------|

|                                     |          |
|-------------------------------------|----------|
| <b>Dimensiuni orificiu montare:</b> | 141x37mm |
|-------------------------------------|----------|

|                                 |                                  |
|---------------------------------|----------------------------------|
| <b>Utilizare - marcă radio:</b> | Alan, EMPEROR, Intek, Maxon, TTI |
|---------------------------------|----------------------------------|

|                                 |                                                                                                                 |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Utilizare - model radio:</b> | Alan 78, Danita 3000, EMPEROR Kenji, Intek M790, Intek M-110, Intek M-120, Maxon CM10, TTI TCB-660, TTI TCB-770 |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------|

|                                         |                     |
|-----------------------------------------|---------------------|
| <b>Caracteristicile radioului auto:</b> | cu orificiu central |
|-----------------------------------------|---------------------|

## Informații suplimentare
